

How we secure supply to our customers Emergency measures during the Corona crisis

Dear Valued Customer

In the light of the emergence and the evolution of the Covid-19 pandemic, BERICAP Group has taken a full range of emergency measures on national and international level with a dual purpose to:

1. Guarantee the well-being of all our employees, customers and partners.
2. Ensure the continuation of production and supply to all our customers.

BERICAP companies have taken a series of internal measures guaranteeing the health and safety of all employees, following directives issued by the health authorities and based on learnings from measures taken for the same reason in our factories in China. Our Chinese factories have meanwhile resumed full activity within a very short time after the lifting of the closure decreed by the Chinese government.

BERICAP companies run at this point of time at full capacity. We increased safety stocks for raw materials to ensure delivery of our products in time. BERICAP has implemented coronavirus specific safety contingency plans for employees in order to secure continuation of production. The global network of BERICAP plants provides back-up possibilities in these challenging times. BERICAP management team and staff make every effort to maintain normal operations in order to serve our customers.

We experience a volatile demand and therefore ask our customers for good forecasts in order to allow a proper allocation of our resources. Bericap takes the responsibility to safeguard the supply of products in these challenging times.

While waiting and hoping for a return to normality as soon as possible, we are ready to help in any way we can. In the meantime, please stay healthy!

With our best wishes

BERICAP Board of Directors
